1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 20, 2008 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cherukuri et al (4,317,838) or Cherukuri et al (4,238,510). Both Cherukuri et al patents disclose coating a chewing gum core by applying thereto a plurality of alternating layers of coating syrup and dusting mix in at least 12 separate coating operations, wherein the coating syrup includes 30-70% sorbitol and/or maltitol, 5% gum arabic, a high-intensity sweetener and a flavor and wherein the dusting mix includes 40-90% sorbitol and/or maltitol, up to 20% calcium carbonate filler and a flavor. Finding the optimum amount of filler (calcium carbonate) in the dusting mix to be applied to the gum core would require nothing more than routine experimentation by one reasonably skilled in this art. It is totally expected that increasing the amount of filler will reduce the cost of the coating since filler is less expensive than sweetener.

3. Claims 1-19 are also rejected on the ground of res judicata since the rejection of each of these claims was affirmed by the Board of Appeals in a decision dated April 21, 2008.
4. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
